PROJECTS

Movie Booking Web Application (HTML, CSS, PHP, JS)
Through this web application. My aim was Setting up the necessary environment for movie theater owners and moviegoers to meet their needs more easily and efficiently.

TourGenie – Travel and Tourism Web Application (MERN stack)
TourGenie is a travel industry focused web application. By using this, tourists can book hotels, plan trips, and choose the vehicles needed for trips. My part in this project was to implement the necessary function to reserve vehicles for trips.
